OUR SERVICES

Finance Global is an international company that operates in the field of investment and exchange of funds. Thanks to a diversified portfolio of investments, we can generate stable profits and provide high returns for our investors.

Our staff consists of professional crypto traders who carry out deals on popular and reliable cryptocurrency exchanges. Our specialists constantly monitor the market of blockchain products, which allows them to invest in promising coins and projects that can bring high returns in a short period. At the same time, our company operates with already proven coins, which have shown stable growth for several years. The predictability of these assets allows our specialists to perform operations with these instruments in a semi-automatic mode.

CRYPTO MINING

With a 2,000-square-foot warehouse in Singapore and a secondary facility in Hong Kong, we are equipped to handle large crypto-mining operations.

Unlike paper money, Bitcoin and other cryptocurrencies are produced mathematically and held digitally. The people who voluntarily offer their computing power to secure these cryptocurrency networks are called miners. Cryptocurrencies don't have a central government or other so-called middlemen that decide about the future of the system.

CRYPTO TRADING

Cryptocurrencies (Crypto) are virtual monies that are built on a Blockchain that typically use a decentralized network to carry out secure financial transactions. Crypto Trading involves speculating on its price movements via a spread betting or CFD trading account or buying and selling the underlying coins via an exchange. With Grant's investment plan, you are provided the benefits of trading in Crypto without owing any risk.

FOREX TRADING

JOIN OVER 7.000.000 PEOPLE WITH THE WORLD'S LEADING HASHPOWER PROVIDER Forex is the world's most liquid and heavily traded market with over 5 trillion traded daily. The Forex market is decentralized, meaning there is no central location where trades are conducted, rather, Forex trading is conducted over the counter (OTC).

NON FUNGIBLE TOKENS

We operate NFT marketplace digital platforms for buying and selling NFTs. These platforms allow people to store and display their NFTs and sell them to others for cryptocurrency or money. Some NFT marketplaces also allow users to mint their NFTs on the platform itself.

In exchange for a fee, our NFT marketplace will typically handle the transfer of an NFT from one party to the other.

The types of NFTs available, fees, payment options, permitted blockchains and other rules will depend on which investment plan you use.

REAL ESTATE

We are building the world's leading real estate investment marketplace. Our mission is to make ownership of investment real estate radically accessible, cost-effective, and simple.

Our platform lets everyone from first-time investors to global asset managers evaluate, purchase, and own residential investment properties with confidence from anywhere in the world. Since launch, we've surpassed \$4 billion in transactions and continue to disrupt the industry with cutting-edge technology and innovations. No matter your investing goals, we are here to help.

GOLD TRADING

Gold Trading is a lucrative option for many Investment firms as it provides the perfect balance between low-risk and high returns trade. Throughout the global financial crisis, many investors chose to invest in gold as a hedge against economic turbulence. Although both gold and currency prices are largely determined by the market and economic events, the specific events influencing those values differ significantly.

OIL AND GAS

Day trading Crude oil is about speculating on short-term price movements, rather than attempting to assess the "real" value of crude. By using a combination of long and short positions, our traders turn a profit whether the price of crude is rising or falling.

Crude Oil trading usually occurs on-spot, commodity markets are non-expiring and are not subject to an expiry date or rollover charges. These markets are priced based on the Futures contract and offer the opportunity to trade these markets long-term without the need to roll.

AGRICULTURE

We are passionate about bridging the gap between investors and agriculture. Farmers will have to produce 70% more food by 2050. With demand for food skyrocketing and the availability of farmland decreasing, we believe that investing in farmland is a smart move.

The world's population is growing, and rural areas are dwindling. Savvy investors see this as an indicator that demand and associated prices for agricultural areas and farmland are set to rise. Investing in agriculture can offer investors opportunities that are ripe for the picking (pun intended).

METAVVERSE

START CREATING WEALTH BY COMBINING BLOCKCHAIN WITH METAVVERSE

Yes, you can invest in the metaverse. But the metaverse isn't a singular digital world; there are many metaverses to explore. For example, in the cryptocurrency space, two of the most popular are Decentraland (CRYPTO:MANA) and The Sandbox (CRYPTO:SAND). Both Mana and Sand are native currencies for their respective metaverse platforms, allowing users to purchase digital real estate, among other things. The tokens could increase in value as more users join these platforms.

OUR SMART APPROACH.

Our culture emphasizes trust, flexibility, and ongoing skills development. we build diversity into teams to help them perform better and make stronger decisions. Our size is an advantage, with ample resources allowing for our investment teams to develop key insights as well as a small fee that enables each team member to have a meaningful impact. Our risk management process is based on the goal of excellent
